

Amendment to the Specification

Please make of record the following Abstract:

Esters or partial esters comprising at least one carboxylic acid radical and/or a radical of a carboxylic acid mixture having from 24 to 34 carbon atoms (component B) and contain at least one carboxylic acid radical and/or a radical of a carboxylic acid mixture having from 8 to 22 carbon atoms (component C). The esters and partial esters of the present invention find particular application as a processing adjunct for plastics, a dispersing agent for pigments or for the production of micronised products.
